Machine Name : Surface grinder

Brand : NAGA5HIMA

Machine Model : NS630

Stock No. : 486129

Ex-factory Date : □□□

Main Technical Parameters:

CNC CNC System: FANUC

Maximum Chuck size :600*300(mm)

Worktable travel :850*340(mm)

spindle motor :7.5(4p) kW

Maximum wheel size Diameter/diameter/width: medium 305/ Medium 76.2/ medium 32(mm)

Floor area width/depth :3750*2760(mm)

Coolant unit: Paper filter type 240 with magnet separator

Magnetic chuck: permanent magnet magnetic chuck

AppVertical machining centerble products: grinding mass production machining , precision drive: gear spline coupling, the accessory fixture for machine tool cell

Etc., metal cutting Tool, electronic valve body spool (mass production parts), precision jig metallurgical tools, steel mechanical seals,

Semiconductor equipment and parts, production of motor motors, automotive hardware parts manufacturing, medical equipment alloys

Materials, automation equipment, textile and sewing and knitting equipment and accessories, packaging equipment and parts manufacturing, electrical appliances

Plastic shell mold, iC chip mold, medical equipment plastic mold, rubber and plastic sealing mold, precision plastic joint

Connector and gear die, die precision accessories punch thimble, metering pump die, powder alloy: carbide fine

Stamping die, electronic connector die, small and medium alloy die casting die, grapHTSK die.

.
