

Machine Name : Coating thickness gauge

Brand : QNIX

Machine Model : QNIX450

Stock No. : 89562

Ex-factory Date : 2025

Main Technical Parameters:

Standard measurement range: 0-3000 μ m or 0-5000 μ m

Non-magnetic substrate mode: 0-2000 μ m or 0-3000 μ m

Measurement precision

- 0-50 μ m: $\leq \pm 1\mu$ m
- 50-1000 μ m: $\leq \pm 1.5\%$
- 1000-3000 μ m: $\leq \pm 2\%$

Display precision: 1 μ m

Environmental adaptability

Minimum measurement area: 10mm $\times$ 10mm

Operating temperature range: -10°C to 60°C
