

Machine Name : Straight tooth conical tooth planing machine

Brand : Tianyi CNC

Machine Model : ykm2350

Stock No. : 66766

Ex-factory Date : 2014

Main Technical Parameters:

CNC System: FANUC Oi Mate-MD

Maximum workpiece diameter: 500mm

Maximum module: 10mm

Number of teeth: 12-200mm

It is suitable for machining of straight bevel gears with an axial intersection Angle of 90°

The structure of the machine tool : It adopts a four-axis CNC CNC System

precision performance : The precision of machining spur bevel gears can reach GB6 grade, suitable for single-piece, small-batch or batch production
