

Machine Name : machining center

Brand : GLEASON

Machine Model : 175HC

Stock No. : 44489404

Ex-factory Date : 2000

Main Technical Parameters:

CNC CNC System: FANUC

Maximum gear external diameter (helix bevel gear/face milling method) : approximately 216 mm

The diameter of the gear in the face gear cutting mode is approximately 190 mm

Ultimate transmission ratio: 10:1

Root taper angle range: -5° to 90°

gear pitch circle diameter: 190.5mm

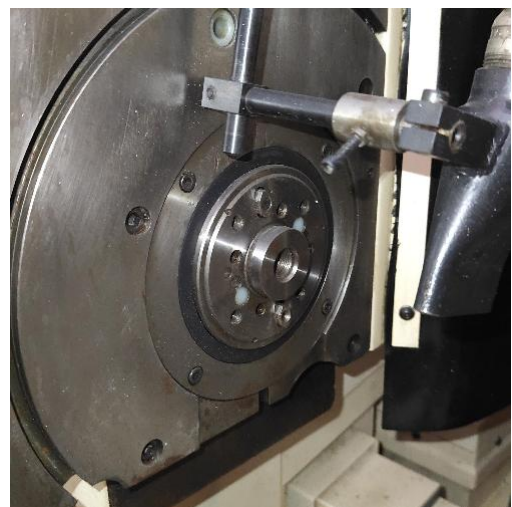

The maximum speed of the Tool spindle is 800 RPM

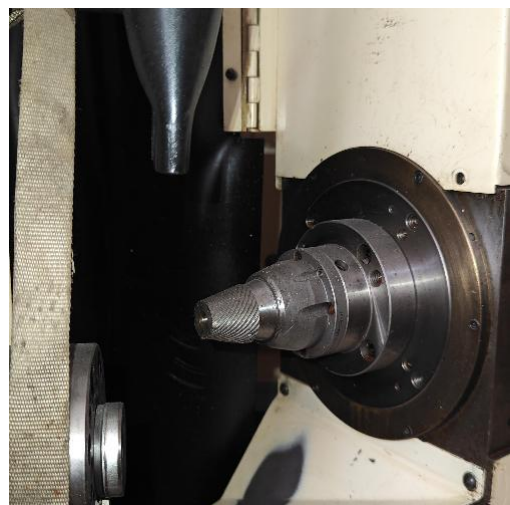

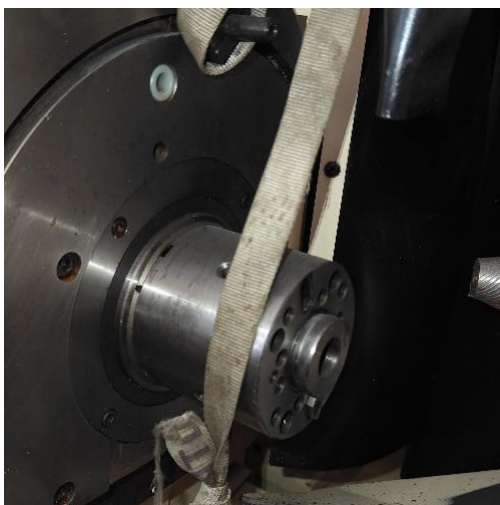

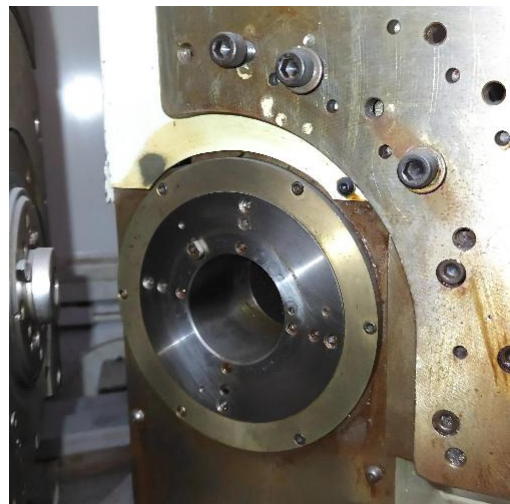

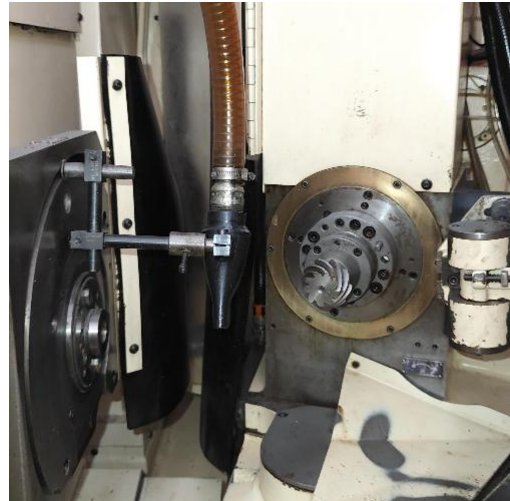

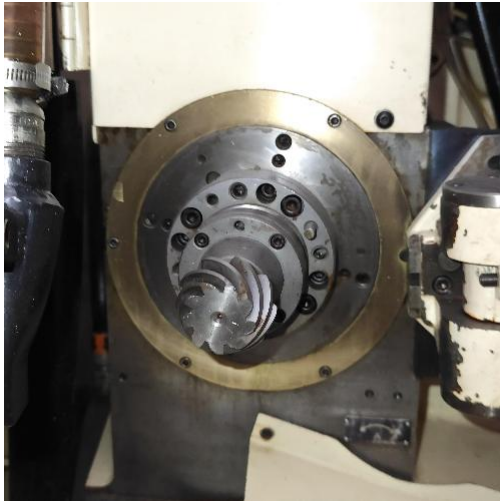

The maximum speed of the workpiece spindle is 750 RPM

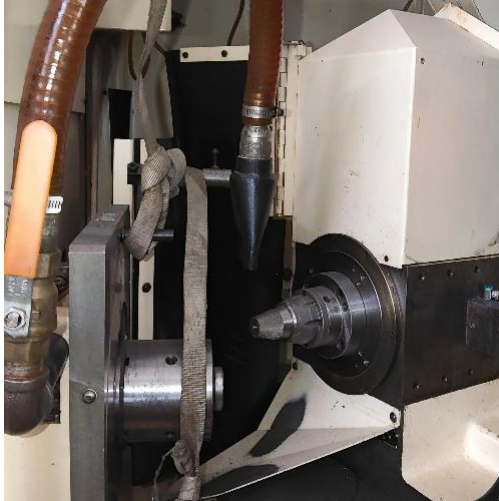

The diameter of the large end taper (#39 taper) : approximately 98.44mm

Taper (per foot) : 39/64

taper depth: 76.2mm
