

Machine Name : detector

Brand : J-league

Machine Model : AX8200

Stock No. : 90481

Ex-factory Date : 2011

Main Technical Parameters:

Ray source:

Voltage:90KV

Power:8W

Focus size:5um

Travel:150mm

Imaging unit:

Field range:4 inches

Resolution:77/110LP/cm

Camera:2 million pixel CCD camera

Travel :290mm

Computer:

Host: Industrial control computer

Monitor :22 inches

Stage:

Identification area:510x420mm

Maximum detection area :435x385mm

Movement controlling type:rocking bar , mouse and keyboard

Tilting angle : $\pm 60^{\circ}$

Navigation System: with HD camera

Software System: Multi-functional image processing software independently developed by UNICOMP

Machine parameter:

Magnification :600x

Power supply :220V 50Hz

Maximum power :1.0kW

Machine footage(Width*Diameter*height):1080x1180x1730mm

Weight :1150kg
